Maximize Your Repairs with Reliance
NEW NAVISTAR MAXXFORCE OVERHAUL COVERAGE AVAILABLE

Reliance Power Parts proudly introduces the next step in Navistar engine coverage, with new kits now available for the MaxxForce DT configuration of Navistar’s widely-used line of engines. When you need to make repairs to a 2007 to 2009 MaxxForce DT 7.6L engine, Reliance can supply you with what you need to get the job done. With bearings in any required size and all the gaskets you need for inframe overhauls, including EGR sealing, a kit from Reliance will serve as an all-in-one solution, making you one purchase from the prevalent parts you need.

Our new kits fit applications from model years 2007-2009, with 7.6 liters displacement, and serial numbers above 3,000,000. The engines in this range operate in ranges starting at 210 and up through 300 horsepower and feature enhanced EGR. These new kits increase Reliance’s coverage of many popular bus and medium-duty truck applications, offering straightforward solutions for repairs to this set of engines.

Pump Up Your Repairs

RELIANCE PUMPS WILL GET YOUR REPAIRS MOVING

Pumps are key to the operation of any engine, moving fuel, oil, and water where they’re needed. Reliance Power Parts can relate to that job, as we serve a similar purpose in the aftermarket engine part business, sending engine parts from our distribution center to independent repair shops and dealers across the country. We've started the year with a special celebration of these important parts. Just use the promo code WEB19 online or mention it on the phone with a salesman for 10% off all fuel transfer, oil, and water pumps. Promotion good through March 31st. Call 1-800-342-2545 or visit us online at www.reliancepowerparts.com to order today!

Reliance: Your John Deere Experts

SUPPORT FOR JOHN DEERE IN THE PAST AND FUTURE

At Reliance, we pride ourselves on the breadth of products we sell, but just as important is the depth of our knowledge. Buying from Reliance doesn't just get you the parts you need, it gets you access to decades of experience in the heavy-duty parts business. And those decades of experience have made us experts in John Deere. We've always offered support for equipment from this iconic brand, with a deep store of insight into working with John Deere products and new product lines developed to keep up with changes to Deere engines. That support will only grow this year, as we look forward to three new product line launches for John Deere in the coming year. When the time comes to repair John Deere equipment, Reliance is ready to help keep you running.

Putting On A Show

RELIANCE AT THE NATIONAL FARM MACHINERY SHOW

One of our favorite times of year at Reliance recently came around again, the annual National Farm Machinery Show in Louisville, Kentucky. We've attended every year since 1985 and always look forward to this opportunity to connect with independent repair shops and dealers from across the country, whether we're displaying new products, meeting new customers, or meeting face-to-face with people only familiar to us over the phone for most of the year. A visit to the Reliance Power Parts booth fills you in on the latest and greatest in all Reliance has to offer and will give you some hints of what we're working on for the future. Thanks to everyone who stopped by this year!
Constantly Growing Coverage
NEW PERKINS PARTS EXPAND RELIANCE’S OFFERINGS

At Reliance, we’re proud that our selection of parts covers such a broad spectrum of applications. That spectrum grows broader still with the introduction of our new line of engine parts for the Perkins 1103 and 1104 engines. These engines appear in a great number of applications, from the tractors that the 1103 serves particularly well to a great variety of industrial applications using either, but especially the 1104.

The 1103 engine boasts a sleek, compact design that delivers 49.5 to 77.8 horsepower at 2200 rpm. It maintains bore roundness under pressure, controls air through the engine well, and is simple to upgrade to one of the more powerful engines across the 1100 series. The 1104, one of those more powerful engines, operates in a range to 67 to 142 horsepower and offers mechanical fuel injection for easy service. When you need to service anything from a tractor to an excavator to a forklift to any one of the many other applications that utilize the Perkins 1100 series, turn to Reliance for dependable coverage.

Employee Spotlight – Shannon Castrillo
SPREADING THE WORD FOR RELIANCE

At Reliance Power Parts, we want to make sure that you have the latest information on our wide variety of available products and sales to keep money in your pocket. Marketing Assistant Shannon Castrillo is an important recent addition to our team who makes sure this important news makes its way to our customers. Coming to Reliance in November from working on social media at a home builders company, Shannon works to craft emails to alert you to new products and sales. She also looks after Reliance’s social media presence and helps prepare for trade shows.

Out of the office, Shannon enjoys travel, often heading out from home to visit museums or dog parks with her son, as well as planning a ski trip soon. Like Reliance as a whole, Shannon is working to always improve our service, taking classes and learning on the job to make sure our customers get the very best work. Relationships with our customers drive Reliance, and Shannon keeps those relationships strong by making sure we keep in touch.
