

Case G188D Connecting Rod Kits

Reliance Power Parts is pleased to announce the availability of new connecting rod kit part number **5A182014**. These connecting rod kits are brand new and are sold with no core return required. **Each connecting rod kit contains four connecting rods.**

Finding a replacement rod for these engines can be a challenge. There are three different rods found in G188D engines which vary by weight depending on the bushing bore boss width and thickness of the I-beam. Our solution is to offer new connecting rods in sets of 4. You no longer must worry about getting the correct weight or spend extra time trying to identify your old rods. Be sure to include them with your next order!

Reliance new connecting rod kit **5A182014** replaces OE part numbers G11847, A136931, A144024.

New connecting rod kit **5A182014** fits the following applications with G188D engines:

Tractors: 430, 470, 530, 570, 630;

Combines: 600, 660;

Crawlers: 310E, 310F, 310G, 350, 350B, 420C, 450;
