

## John Deere 6076 Early and Late Major Overhaul Kits.

Reliance Parts Corporation is pleased to announce the addition of 6076 early and late major overhaul kits.

Reliance has offered the RP624 major overhaul kit which consisted of hi-ring cylinder kits and a gasket set for the early and late 6076 engines, and the RP665 major overhaul kit which consisted of low-ring cylinder kits and a gasket set for the early and late 6076 engines. In order to provide gasket sets that more completely offer the necessary pieces for both early and late applications, Reliance now offers a gasket set (NRG27878) for early 6076 engines as well as a separate gasket set (NRG27881) for late 6076 engines (refer to Parts & Service Bulletin 1.02-3 dated August 15, 2001).

Following lists the 6076 major overhaul kits we now offer with application details:

PART NUMBER	DESCRIPTION	APPLICATION
RP769	Hi-ring Piston, Early Gasket Set	6076 Early S/N up to 499,999 (Except 4955, 4960 & 8560 Tractors)
RP770	Low-ring Piston, Early Gasket Set	6076 Early S/N up to 499,999 (For 4955, 4960 & 8560 Tractors)
RP624	Hi-ring Piston, Late Gasket Set	6076 Late S/N 500,000 and up (Except 4955, 4960 & 8560 Tractors)
RP665	Low-ring Piston, Late Gasket Set	6076 Late S/N 500,000 and up (For 4955, 4960 & 8560 Tractors)

These new overhaul kits are very popular additions to the Reliance program and offer better coverage for the early and late 6076 engines. Be sure to add them to your next stocking order.
